FULL WORK RIGHTS IN AUSTRALIA | Available Full-Time | Open to Relocation

PROFESSIONAL SUMMARY

QA Engineer with **over 6 years of experience** delivering high-quality software for FinTech, enterprise and government sectors. Skilled in **Test Automation (Cypress, Selenium, Playwright)** and **API validation**, with proven experience testing complex, multi-system integrations and compliance-heavy platforms. Strong technical background in **SQL and database integrity**, reinforced by a recently completed Diploma of IT (Database and Data Management), enabling advanced backend testing and data-driven QA strategies. **ISTQB Certified** and **Scrum professional**, committed to reducing bug leakage and accelerating **CI/CD pipelines**.

Position	Experience
Junior QA Engineer	Current (since Oct 2026)
Automation QA Engineer	1.1 years
MID-Level Quality Assurance Analyst	3.1 years
Web Application Tester	0.7 years
Software Testing Intern	2 years

MAIN ACHIEVEMENTS

- Led testing on a major update of a financial web application for **Mizuho Bank**, used by a global workforce of 50,000+ employees; implemented **Cypress** for test automation and delivered a hands-on workshop to the QA team.
- Tested government compliance platforms at Vox Tecnologia with complex multi-agency integrations: **SIGFÁCIL** (the REDESIM integrator connecting business registry bodies, tax departments, fire services and environmental agencies), **SIGPub** (one of Brazil's pioneering official legal publications platforms) and **SLIN** (integrated licensing).
- Performed remote testing for **DHL** on updates to its TMS (Transportation Management System), WES (Warehouse Execution System) and WMS (Warehouse Management System).
- Worked in a 6-person team (1 lead, 3 developers, 1 BI, 1 tester) to deliver guest and staff identification software for an entrepreneur fair in Brazil, serving 100,000+ visitors and 1,000+ exhibitors annually.

PROFESSIONAL EXPERIENCE

Junior QA Engineer | Endpoint IQ | Brisbane, Australia
Oct 2026 – Present

- Test Endpoint IQ's research administration SaaS platform, used by universities and research institutions.
- Perform functional and regression testing within an Agile team, logging and tracking defects with developers.
- Validate backend data with SQL queries to confirm data integrity across the platform.

Automation QA Engineer | Matera Financial Systems | Brazil
Jul 2021 – Aug 2022

- Managed version control and test pipelines using Jenkins, Git (Stash) and CI/CD practices.
- Designed test documentation following Test Driven Development (TDD) principles.
- Mentored junior QA engineers, fostering a culture of quality and knowledge sharing.
- Led planning, validation and review meetings, building domain knowledge in investments and taxation.
- Reported and tracked defects in Azure DevOps.
- Set up a Docker-based local environment to align testing efforts across the team.

MID-Level Quality Assurance Analyst | INDRA Minsait Brasil | Brazil
Aug 2019 – Jul 2021

- Reported testing progress in daily stand-ups, sprint planning and other Agile ceremonies.
- Modelled data flows with Bizagi Modeler to design efficient processes.
- Reviewed requirement priorities and project documentation with stakeholders.

- Used Jenkins to execute builds and provision test environments.
- Automated desktop applications and executed API tests.

MID-Level Quality Assurance Analyst | Vox Technologies Solutions | Brazil
Jun 2018 – Aug 2019

- Tested government compliance systems (SIGFÁCIL, SIGPub and SLIN), validating multi-agency integrations and regulatory business rules.
- Aligned testing activities with project goals and timelines across cross-functional teams.
- Maintained and optimised functional and automated tests in Protractor, improving test accuracy and efficiency.
- Tracked tasks and defects in Jira to support project coordination.
- Ran database tests with MySQL and Oracle SQL to verify data accuracy and system performance.
- Documented and reported test results to team members and stakeholders.

Web Application Tester | BeHoH Solutions | Brazil
Sep 2017 – May 2018

- Owned web application quality as the sole tester working alongside developers in an Agile cycle.
- Set up and maintained test environments.
- Executed manual and automated tests using Katalon Studio and Selenium IDE.
- Used MySQL to verify data integrity behind application features.

Software Testing Intern | Dataprev (Federal Government) | Brazil
Aug 2014 – Jul 2016

- Completed a two-year internship at a federal government IT agency, supporting system quality.
- Wrote test plans and test cases, and executed them to verify software behaved as intended.
- Learned and applied test automation with Katalon Studio and Selenium IDE.

EDUCATION

- **2024 – 2026** ICT50220 Diploma of Information Technology (Database and Data Management) | Mindroom Innovation – Australia (Completed August 2026)
- **2023** Certificate IV in Business Management | Gold Coast Learning Centre – Australia
- **2022** General English | Gold Coast Learning Centre – Australia
- **2017** Bachelor's Degree – Computer Science | Universidade Cruzeiro do Sul – Brazil

CERTIFICATIONS

- **2022** Automated Tests with Cypress | Udemy
- **2021** Swagger: API Documentation | Alura Brasil
- **2021** GitHub and Git | Alura Brasil
- **2021** Certified Tester Foundation Level (CTFL) | International Software Testing Qualifications Board (ISTQB)
- **2020** Scrum Foundation Professional Certificate | CertiProf
